

Erica Gilmore

I, Erica Deann Gilmore state on August 6th, 2011 that the events below are true and factual regarding being a victim of Organized Group Stalking from 1999 to current date.

My name is Erica Deann Gilmore; I am an African America female and have been a victim of Organized Group Stalking since 1999. My stalking began in Ventura, California and has continued in Santa Barbara, California. From 1991-1999 my daughter and I lived in a downstairs apartment in the Garden Estates apartments in Ventura, Ca. The property owners were named Martha and Bill Spriggs (Spriggs and Company Management). In 1998 my bathroom ceiling was flooded by the upstairs unit. For one year no repairs were made on the water damage. I was receiving housing assistance through the San Buena Ventura Housing Authority. The unit was failed during an inspection in 1998. I continued to pay my rent but no repairs were made. The bathroom ceiling and walls began to rot from mold and mildew and became inhabitable.

In 1999 I was given a 30-day notice to move by Spriggs and didn't think it was fair considering the circumstances. I went to the Housing Authority and spoke to my worker Laura Hogan and requested copies of the 1998 inspection report. I needed the paper work because I was going to sue the management company for back rent. A few days later I was told by Laura Hogan that the paper work in my files were "accidentally destroyed." I had no proof that there was a pre-existing condition. I believe that Laura Hogan (Jehovah's Witness) deliberately destroyed my paperwork to discredit me. I bring up her religion in parenthesis because I have received harassment from some of these people. I contacted the City of Ventura and they came and did an inspection and deemed it un-livable. Afterwards, I could not find a place to live or a job (blacklisted). Every landlord and management company refused my application. One landlord told me he rejected my application because "you didn't move when they gave you the 30-day notice." A property management company told me they didn't want to get involved and returned my \$30 application fee. Eventually, I found a really nice Mexican husband and wife couple who were going to rent to me. The place was on Ramona Street in Ventura and they had done extensive repairs. The place had new flooring and kitchen appliances and was beautiful. I was ready to move in and sign a contract when The Gas Company slapped a violation on the unit and we could not move in. I realized then that we were deliberately being made homeless. I lived in Motel 6 and would

spend \$50 per night for a room to stay out of the cold and to get a break from the homeless shelters.

The harassment continued with the Ventura police department. A man named Graham Jeffries falsified a police report stating that I accused The Hell's Angels Ventura, California Chapter members of stealing my laundry. I contacted and met with two police supervisors who refused to amend the false report. I wrote a 5-page complaint and sent copies to the mayor, more supervisors of the police department and outside agencies. Afterwards, the Ventura police constantly harassed me and it escalated with two female members of the Ventura Sheriff's Department getting involved. I made complaints to their supervisors, mayor's office, FBI, and politicians. At 10pm one evening in Motel 6 the Ventura Police knocked on the door claiming they got a call regarding a domestic dispute between a man and woman. I explained that only my daughter and I were in the room. The police threatened to arrest me if I did not open the door. The police claimed that the Motel 6 attendant told them my room number. I contact the front desk during this chaos and was told that the police came into the office and request a list of the rooms. A woman in a room next door told the police that it was a downstairs couple who got in an argument. Still they insisted that I open the door or be arrested. I did not open the door and eventually they left. Prior to all of this happening I never had any problem with the police and sheriff's department. No one would help me get the harassment stopped. I also had strangers in the community harassing me and yelling stuff at me from their cars, giving me dirty looks, and laughing at me as I walked down the street. I use to own a white Dodge hatch back and I believe that there were tracking devices placed on my vehicle.

In addition, a "death mark" was put on both me and my daughter who was 8yrs old at the time. Their plan for my daughter was to have her taken away from me and sold into sexual slavery, abused in foster care, and or shot with a gun in public. I discovered that false allegations of child abuse and neglect were made against me to Ventura, CA and Santa Barbara, CA Child Welfare Services. I love my daughter very much and they were trying to turn me against my own child by making it difficult for me to provide for her. I believe the group stalkers wanted me to see my daughter as a burden and abandon her. I never did that! I have spend many days and nights crying, depressed, and scared wondering why someone would want to kill me and my daughter. Since I have been a victim only 2 people have had the decency to tell me what they knew about my situation. The group stalkers are human personifications of evil. Since I could not find a place to live, was blacklisted, and being harassed I left Ventura, California.

In 2001 when I moved to Santa Barbara, California the harassment continued. My daughter and I lived in homeless shelters. When I tried to find a place to live in to I was told “we don’t rent to people with children.” I heard this over and over again. The blacklisting continued and I could only find work through temporary agencies once in a while. No matter where I went I went in Santa Barbara I would get street theater, followed and harassed. My main harassment comes from White males, White females, Mexican males, and Mexican females. However, there are other races involved too but these two races are the most aggressive. I believe some of the people are racist. In 2002 we moved into the Coronell Apartments in Santa Barbara. A short time after signing the lease the on-site manager informed me that different people in Santa Barbara were telling him not to rent to me. When I asked who these people were he would not tell me. During my stay there the apartment had been illegally entered into several times. I found an apartment through Radis Property Management in 2003. As time went on that unit was illegally entered with items being misplaced from different rooms. I also believe that there were listening devices and cameras in the apartment. In the corner of the bathroom ceiling, my bedroom and another room I discovered drill holes that were not there before. I had a strange feeling that something was not right in that apartment. I felt like someone had been in there when we were gone. I also got the feeling we were being watched.

When we were homeless from 1999 to 2002 the group stalkers were always following us and I knew that someone wanted to kill me. A black limousine with the California license plate **LINK 17** followed me in Ventura, California and when I moved to Santa Barbara, California as well. The only person I saw in that limousine was an older white male with gray hair in a suit after he followed me to where my daughter went to elementary school in Santa Barbara. I don’t know who this man was but I got a bad feeling about him and he just kept staring at me as I walked in a different direction.

Since the targeting I have been blacklisted and they tried to turn me into a prostitute. In the beginning stages of my stalking the men in the stalking groups would approach me out in public; and ask me if I wanted to have sex in exchange for money. The theme of my targeting is the word “whore.” What I mean by this is

that everything has been centered on trying to get me to have sex in exchange for food, money, a place to live etc. I learned that different men in Ventura and Santa Barbara were spreading rumors stating that they had sex with me; these were lies. In Ventura they were spreading lies saying I was a crack cocaine drug dealer. I was living off of \$400 from welfare, receiving food stamps and getting unemployment checks. I was sleeping in homeless shelters and my car trying to find a job and a place to live for me and my daughter. In every effort I made to find a place to live and get a job, I was sabotaged. When the rumor campaigns did not work in 2002 the Child Support Divisions in Ventura, California and in Texas along with Laboratory Corporation of America falsified DNA results stating that my daughter's father Bobby Fernandez Najar in Texas was not her father. This occurred after the Child Support Division in Santa Barbara filed papers to extradite my daughter's father. The Ventura Child Support Division produced fraudulent paper work with a blood test showing negative DNA results. I have never taken a blood test for paternity only the swab on the side of the mouth. A male employee from the lab in Texas told me that I was being lied to and that they were playing games with me. When I called to speak to this employee again his attitude changed and he was unreachable via phone. This goes back to the theme of my targeting the word "whore." By falsifying DNA documents I look like I slept around with many different men and this is not true! I know who the father of my daughter is and his name is Bobby Fernandez Najar.

For the past 12 years the Organized Group Stalkers have become obsessed with every aspect of my life. They have turned every aspect of my life into a competition and a game. From going to college, finding a job, making friends, raising my child, finding love in a dating/ marital relationship, and my spiritual dedication to God (Jehovah's Witness) has been turned into a competition and a game. I have had multiple cell phones and land lines with Verizon, T-Mobile, Blue Casa Communications, Cingular, Boost Mobile and Cox Communications that have been illegally listened in on by group stalkers. When friends and family would call they would get a recording saying my number was disconnected when the bill was paid. I would also have my telephone service interrupted for days at a time. I would also get telephone bills for three times the amount. When I no longer had service with Blue Casa Communication they produced a bill claiming I did. The Gas Company and Southern California Edison would produce bills that were three to five times the amount of my normal usage. I have also been harassed by members of the Fire Department and ambulance drivers as they would drive by my apartment I rented from Radis Property Management or when I was in public.

The Organized Group stalkers are trying to get me to have a nervous breakdown and create a mental illness in me. I have been suffering from depression as a result of being a targeted individual. I have suffered financial losses, loss of peace of mind, loss of privacy, enslavement, threatened and I want my life back.
