Dear Senator,

Thank you for taking the time to hear our concerns. As our lawyer has stated, we are victims of covert criminal activities that have gone on unchecked for far too long. It is a campaign of lies, cover-ups, suppression, control, harassment, and domestic torture. All across this country and the globe covert harassment groups have sprung up and have begun to victimize a wide spectrum of persons in this society; from government whistleblowers, illegal human research subjects, and political activists to targets of opportunity such as women, children, the elderly, African-Americans and other minorities, gays and lesbians, newly-immigrated citizens, prisoners, those institutionalized with mental illness, as well as many unsuspecting, law-abiding Americans.

People in every state of the union are being targeted for abuses such as 24/7 organized stalking and monitoring, harassment on the job and in their private affairs, and directed energy weapons assaults that induce severe physical trauma such as shocks, stings, burning, nausea, and sleep deprivation, to name a few. The average American would be astonished to learn the extent to which secret surveillance technology has advanced today; to learn that remote manipulation and torture of the human mind and body is now possible and that all are at risk of horrendous abuses at the hands of technological predators.

We believe the source of these attacks to be military intelligence and other government investigative agencies with ever-expanding budgets for research and acting

as though they are beyond any oversight.

We, the undersigned, are therefore compelled to request that congressional hearings be held to examine our issues and hear our accounts of what is happening covertly in this country. It is time to end the cover-up and restore our country once again to its founding constitutional principles of freedom and justice for all.

Derrick Robinson, President
Freedom From Covert Harassment and Surveillance
