Myself and other inmates all over the United States are complaining about a technology that can induce audio and visual perception that isn't apparent to others. It seems to oppress and harass with ill-treatment and to annoy persistently through communication and visuals only the targeted inmates can hear and see. I am requesting that your office do a full investigation concerning this information I am bringing to your attention in this letter. We need to know the correct name of this technology and how it is targeting inmates in these prisons all over the United States?

Your attention in this matter will be greatly appreciated.

Sincerely,

Sanders E. Brown Jr.
